

Errata, Connolly & Podladchikov, TECTONOPHYSICS 324:137-168

The contours are mislabeled in Figure 5b, the $\phi_c=0.39\%$ contour label applies to the contour at highest permeability and lowest sedimentation rate, whereas the $\phi_c=50\%$ contour label applies to the contour at lowest permeability and highest sedimentation rate, and the intermediate labels should be juxtaposed accordingly.

p 148, column 2, 4th line from the bottom: $\lambda_c z/2$ should read $\lambda_c \approx z/2$.
